Some points for us to consider:

Two parents commented that subjects outside of the core aren't included. Through the additional face to face meetings with teachers, this will be covered then and will also be covered in greater detail in the summer.

Three parents asked for clarity on what constitutes 'always' and 'mostly' on the reports. We will clarify this through face to face meetings and within 'meet the teacher' meetings in 2019/20.

Three parents commented that the report feels less personal. We have changed the format to ensure that the information to parents is much clearer but also included additional face to face meetings to ensure that the personal aspect of teacher feedback is included.
